

# ABSTRACT OF THE DISCLOSURE

A first, a second, and a third reel units consist of an inner and an outer reels respectively. A symbol "target" disposed in the outer reel forms a composite symbol  
5 by overlaying the symbol "target" on the symbol in the inner reel. The symbol "target" is related to win. When a normal game is started, the inner reel rotates in a normal direction, and the outer reel starts to rotate in the normal and a reverse directions in order to fluctuate the symbol "target"  
10 between an upper and an lower portions of a display window. Thereafter, the inner reel stops, and then the outer reel stops after a predetermined time. The player wins the game when the same symbols are aligned in a row in winning lines, or when the same composite symbol is displayed in the first,  
15 the second, and the third lines respectively.
